Re: Emergency Medicine Physician Assistant Position

Dear Avery Morgan:

I am applying for the Emergency Medicine Physician Assistant position at Capital Regional Medical Center. I recently earned my Master of Physician Assistant Studies, hold current NCCPA certification and an active California PA license, and can begin immediately upon completion of credentialing. Having trained in your emergency department, I am especially drawn to the team's structured onboarding, collaborative practice, and commitment to timely, patient-centered care.

During my Capital Regional rotation, I assessed adult and pediatric patients with undifferentiated acute complaints, presented focused differentials and plans, and performed wound closure, splinting, incision and drainage, foreign-body removal, and point-of-care testing under supervision. That experience strengthened my ability to organize a high-acuity evaluation, communicate changes promptly, and incorporate feedback into safe next steps.

I also bring two years of experience as an emergency department technician in a 38-bed department, where I supported resuscitations, performed ECGs and phlebotomy, maintained equipment readiness, and precepted 12 new technicians. This background has made me calm under pressure, attentive to workflow and safety, and comfortable contributing across disciplines while continuing to learn.

I would welcome the opportunity to return to Capital Regional as a PA and contribute that clinical foundation, reliability, and commitment to growth. Thank you for considering my application. I would be pleased to discuss how my experience and goals align with your emergency medicine team.

Sincerely,

Maya Chen, PA-C
